

YOU ARE BEHIND EVERY MISSION

friend, you make our work at sea possible.

Thanks to you, my campaign crew and I can travel out to Australia's marine parks on Oceania, using our investigative capabilities to uncover what's really happening inside them. While we're out on the water, we know you are there with us.

We'd love to hear from you. **Would you like to send a quick message to the crew?**

Because of your support, Greenpeace can go where others won't.

Oceania is a specialised campaigning vessel that can navigate shallow waters and reach “protected” areas that are hotspots for industrial fishing. Few ships can do what she does, and without you, we couldn't take her out to sea.

But the mission doesn't stop at the surface friend. Your donation also helps fund the underwater cameras that go deeper, documenting the marine life that makes these waters extraordinary, and gathering the evidence we need to turn political promises into real, lasting protection.

Every time we head out, we carry the support of people like you with us. That's what makes this possible, and that's what makes it matter.

Elle Lawless
Senior Campaigner
Greenpeace Australia Pacific
